SUMMARY

I love coding. Self-taught and always wanting to learn more, I'm constantly honing my skills by picking up new challenges. My journey has taught me to be confident in my ability to find the answer, no matter the problem at hand. I'm all about diving in, learning quickly, and perfecting my craft. Now, I'm looking for the next big problem to solve with a team that values hard work and results, in a space where code contributes to something I'm passionate about.

LANGUAGES	FULL-STACK	DB & ORM	APIs	DEVOPS	MISC
TypeScript	React	Prisma	REST	AWS	Figma
JavaScript	Node	PlanetScale	tRPC	GCE	Photoshop
Python	Next.js	MongoDB	GraphQL	Vercel	Illustrator
PHP	Tailwind	PostgreSQL	Apollo	Docker	Generative AI
C#	Express	MySQL	Serverless	Kubernetes	ClickUp
HTML	Clerk	Redis	OpenAPI	Cypress	Discord
CSS	Redux	Upstash		Git	Jira

EXPERIENCE

BUILDASOIL — LEAD FULL STACK DEVELOPER
Aug 2019 - Jun 2023

As the Lead Developer at BuildASoil, I guided a team of 4 through the successful development and deployment of an extensive internal ERP system. Utilizing the MERN stack and the Next.js framework, we built a robust solution that streamlined business processes, significantly reducing costs. The project, initially hosted on AWS, was seamlessly transitioned to Vercel for greater efficiency. I implemented project management strategies using ClickUp, employing sprints, Gantt charts, and other tools to consistently meet our KPIs and ensure on-time delivery.

LEATHER TREATY — FULL STACK WEB DEVELOPER
Jun 2015 - Dec 2019

As a Full Stack Web Developer at Leather Treaty, I engineered a comprehensive e-commerce platform using the LAMP stack, resulting in a substantial increase in revenue due to automated technical SEO. Further contributing to operational efficiency, I designed and developed a range of internal web apps on the MERN stack, optimizing logistics and other key processes.

I was hired initially as a Graphic Designer, where for a year I created compelling artwork for licensed merchandise distributed globally. Demonstrating my proficiency in the Adobe Suite, I prepared files for press and automated templating processes, significantly improving workflow efficiency.

VITALIZE — FREELANCER
Aug 2010 - Present

I've tackled a wide range of projects from design to coding. Over time, I've honed my focus to specialize in Node.js and React development, a niche that has proven to be in high demand. I've cultivated a strong reputation in the freelance market and accelerated my growth as a Full Stack Developer.
